[Client / Agency Name]

A WORD OF WELCOME

Thank you for choosing us as your *automation partner*.

We are thrilled to formally welcome you. We help recruitment agencies grow by installing intelligent systems that answer every candidate in minutes, keep every document compliant, and put the whole business in the director's pocket — so your team focuses on placements, not paperwork.

This Welcome Packet explains what to expect at every step of working with Naim Automation Systems Co. Keep it close — it answers most questions before they arise.

CONTENTS

- 01 Welcome
- 02 Our Promise & Working Principles
- 03 Process & Timeline
- 04 What We Need From You
- 05 Communication & Support
- 06 Next Steps

OUR PROMISE

Quality Engineering

Every system is built to production standard, tested end-to-end, and demonstrated live before you pay the balance.

Honest Communication

Straight answers, realistic timelines, no jargon. If something is not worth automating, we will tell you.

Measurable Results

Every deliverable saves time, saves money or removes mistakes — and your monthly report shows the numbers.

Data Respect

Your candidate and business data is processed only to deliver your system, in line with the Kenya Data Protection Act.

PROCESS & TIMELINE

1

Consultation Call — Day 0

We walk through your audit, agree scope and answer every question. Booked via our scheduling link.

2

Quotation & Agreement — Days 1–3

Formal itemised quotation + service agreement. 50% deposit confirms the project.

3

Build & Weekly Updates — Days 4–18

We engineer your system and send progress updates so you are never in the dark.

4

Live Demo & Training — Days 19–20

You see the system perform live. Your team is trained. Balance is settled.

5

Handover & Care — Day 21 →

Owner's manual delivered. Monthly care plan begins the following month — with monthly reports.

WHAT WE NEED FROM YOU

- ✦ **A single contact person** authorised to give approvals and answer questions
- ✦ **Access credentials** for the accounts your system will connect to (shared securely — never by plain text)
- ✦ **Your current process** — a short walkthrough of how things are done today
- ✦ **Sample data** — e.g. example candidate records or documents (anonymised is fine)
- ✦ **Branding assets** — logo and preferred wording for client-facing messages
- ✦ **Deposit payment** — the project timeline starts the day it is received

COMMUNICATION & SUPPORT

During The Build

Progress updates via WhatsApp/email.
Questions answered within one business day.
One weekly summary so you always know where we are.

After Handover

Support via your dedicated channel — response within one business day; emergencies prioritised. Monthly report on the 1st of each month.

Guideline: To keep your project on schedule, kindly consolidate feedback through your appointed contact person. Scope changes are always possible — they are simply quoted in writing first, so there are never surprises on the invoice.

NEXT STEPS

1

Book your consultation call via our scheduling link

2

Review & sign the quotation and agreement

3

Send the checklist items — and we begin

WE ARE HONOURED TO BUILD WITH YOU. — M.A. SALMIN
