METHODOLOGY

What we examined — *and how*

This audit was conducted from the outside, exactly as your candidates and employer clients experience your agency. Each finding below is evidence, not opinion.

TEST	WHAT WE MEASURED	RESULT
Response Time Test	We enquired as a candidate on your public channels and timed the first reply	
Digital Presence	Website availability, speed, mobile experience, online intake capability	
Follow-up Test	Whether an unanswered enquiry ever received a follow-up, and after how long	
Reputation Scan	Public reviews and complaints across Google & social platforms	
Visibility Check	How easily candidates find you vs. competing licensed agencies

Responding within 5 minutes makes conversion up to 10x more likely than responding after 30 minutes. 80% of placements require five or more follow-ups; most offices stop after one.
